

Problem

Complete the countingSort function.

countingSort has the following parameter:

int arr[n]: an array of integers Returns Nothing. Print the sorted array with each element separated by a space.

Input Format

The first line contains an integer n, the number of elements in the array. The second line contains n space-separated integers. 10 11 3 2 1 4 5 6 4 3

Constraints

$1 \leq n \leq 100000$ $0 \leq arr[i] < 100$

Output Format

1112334456
