

Majority Element 82

[Problem](#)[Submissions](#)[Leaderboard](#)

RATE THIS CHALLENGE

Given an integer array of size n , find the majority element. A majority element is an element that appears more than $\lfloor n/2 \rfloor$ times.

If a majority element exists, print it. Otherwise, print -1 . Complete the function `majorityElement` that takes the following parameter:

`int arr[n]`: an array of integers Returns `int`: the majority element if it exists; otherwise -1 .

Input Format

The first line contains an integer n , the number of elements in the array. The second line contains n space-separated integers.

Constraints

 $1 \leq n \leq 10^5$ $-10^9 \leq arr[i] \leq 10^9$

Output Format

Print the majority element if it exists; otherwise, print -1 .

Language

C

```
1  #include <stdio.h>
2  #include <string.h>
3  #include <math.h>
4  #include <stdlib.h>
5  int main() {
6      int n, arr[500000],maxnum;
7      int count[500000] = {0};
8      scanf("%d", &n);
9      for (int i = 0; i < n; i++) {
10         scanf("%d", &arr[i]);
11         count[arr[i]]++;
12     }
13     int max = 0;
14     for (int i = 0; i < 500000; i++) {
15         if (count[i] > max) {
16             max = count[i];
17             maxnum=i;
18         }
19     }
20     if(max >=n/2){
21         printf("%d", maxnum);
22     }
23     else{
24         printf("-1");
25     }
26
27     return 0;
28 }
29
```
